BITCHES

Thank you so much for such a lovely entry. I was only sad that very many excellent bitches had to go unplaced but it had to be the dog on the day and a number who I had admired in the past were not in their best coat or showing to advantage. I was looking for a balanced bitch with a good layback of shoulder and length of upper arm, I found that many otherwise nice quality bitches were upright in shoulder so lacking in front angulation. However I was really spoilt for choice with many really good ones to choose from.

SPECIAL VETERAN BITCH - 5 - 3 abs.

1 Butterworth's - Sh. Ch. Applebrook Lily of the Field

Very well balanced 9 year old with attractive mid gold coat.. Feminine head with gentle expression. Straight front with good depth of chest. .Excellent reach of neck and layback of shoulder. Level topline and well angulated quarters – moved well. Looking very good for her age and a well deserved BVIS.

2 Bowden's - Naiorrl Princess Melissa .

Attractive dark gold bitch who looked very good for her 11 years. Stronger head with soft expression. Straight front with plenty of bone. Short coupled with well angulated quarters from which she moved out very well with drive.

MINOR PUPPY BITCH - 39 - 9 abs.

Such a lovely class with so many different types at different stages of development.

1 Linfield's - Dreaming Delight at Tonara

I really fell for this happy confident baby with such a balanced flowing outline. Nicely presented mid gold coat. Such a pretty head with good depth and breadth of muzzle and darkest pigment. Plenty of bone and very well angulated shoulder and upper arm. Well sprung ribs and strong well angulated quarters from which she moved out with plenty of drive for one so young. So well handled and always at one with her handler. A very well deserved BPIS

2 Scott's - Gunmarsh Razzamatazz.

A very feminine quality cream baby of just 6 months with sweetest head and such a gentle expression with darkest pigment. Very good reach of neck and front angulation. Well boned with nice tight feet and well angulated stifles. She needs time to fulfil her potential but is very promising for her age. Moved out very freely and at one with her handler .
